DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a lens with at least one aspheric lens surface, classified in class 359, subclass 708.
- II. Claim 13, drawn to compensation optics for testing, classified in class 356, subclass 124.

The inventions are distinct, each from the other because of the following reasons:

- 1. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case invention I is directed to a lens with at least one aspheric lens surface. Invention II is directed to compensation optics for testing.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

- 2. During a telephone conversation with Robert Kestenbaum on 03/05/04, a provisional election was made without traverse to prosecute the elected invention of Group I, claims 1-12. Affirmation of this election must be made by applicant in replying to this Office action.

Art Unit: 2873

Therefore, claim 13 is withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Examiner's Amendment/Comment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

4. During a telephone conversation with Robert Kestenbaum on 03/05/04, claim 13 is being cancelled. Therefore, claim 13 is withdrawn from further consideration by the examiner. Since claim 13 has been cancelled, this application is in condition for allowance.

5. Authorization for this examiner's amendment was given in a telephone interview with Robert Kestenbaum on 03/05/04. The application has been amended as follows:

In the claims:

Art Unit: 2873

Claim 1, line 15, after “of”, replace “the” with --a--;

Claim 1, line 15, after “from”, replace “the” with --an--;

Claim 1, line 16, delete “7”;

Claim 1, line 19, replace “is” with --are--;

Claim 4, page 23, line 6, after “of”, replace “the” with --a--;

Claim 4, page 23, line 6, after “from”, replace “the” with --an--;

Claim 4, page 23, line 7, delete “7”;

Claim 5, line 1, delete “(AS1)”;

Claim 7, line 1, after “second”, add --convexity--;

Claim 8, line 1, delete “(S2)”;

Claim 8, line 2, delete “(AS1)”;

Claim 8, line 3, delete “(AS1)”;

Claim 9, line 1, after “claim”, replace “7, where in” with --6, wherein--;

Claim 11, line 4, after “1”, add --or 4--;

Claim 12, line 2, after “1”, add --or 4--.

Reasons for Allowance

6. Claims 1-12 are allowed. The following is a statement of the examiner's reasons for allowance. The present invention relates to a lens with at least one aspheric lens surface. More specifically, independent claim 1 reads on a lens with at least one aspheric surface by means of Zernike polynomials, which is known in the art made of record. However the prior art fails to disclose the required conditions required to fulfill the claimed aspheric lens surface. The

Art Unit: 2873

claimed invention is therefore considered to be in condition for allowance as being novel and non-obvious over prior art.

7. The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 USC 102 or 103 would be improper. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Other Information/Remarks

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Morgan et al. (U.S. Patent 6,018,424) discloses teaching of aspheric surface defined by Zernike polynomials. Schuster et al. (U.S. Patent 6,646,718) discloses projection objection includes aspheric lens surface.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jack Dinh whose telephone number is 571-272-2327. The examiner can normally be reached on M-F (9:30 AM - 6:00 PM).

Art Unit: 2873

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Georgia Y Epps can be reached on 571-272-2328. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
